

The background features several layers of light blue, wavy, semi-transparent lines that create a sense of depth and movement. Scattered throughout the white space are several thin, light blue circles of varying sizes, some overlapping each other. The overall aesthetic is clean, modern, and minimalist.

Book curation

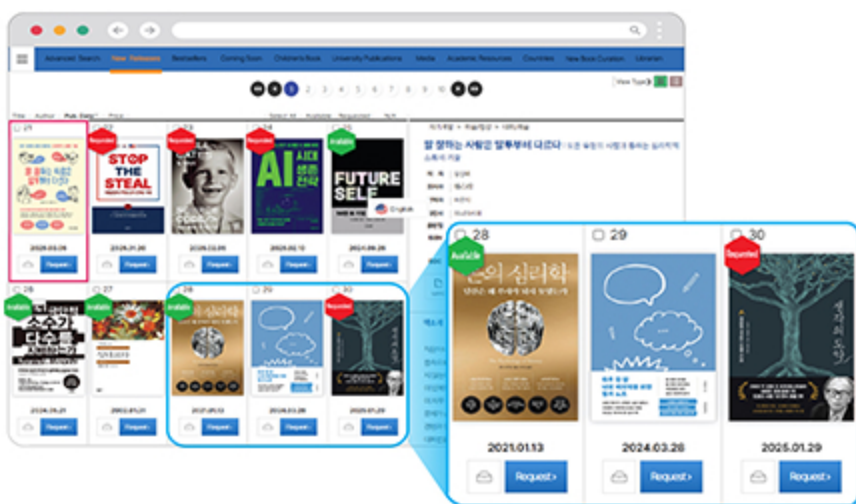

► Book Recommendation service

The one-on-one customized information service where users can receive email recommendations for newly published books that match their pre-set interest keywords or categories

One click to request a purchase

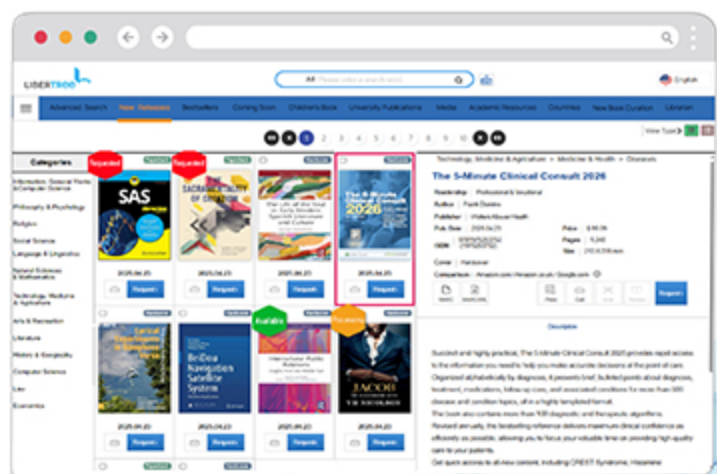

✓ Even if there is no information available about the book you're looking for or if you're unsure about which book to search for, you can easily find books using just keywords

✓ Once you click on 'Request' from the search results, a purchase request for the book as a 'Desired Book' is automatically sent to the LAS

Automatic duplicate check in Real-time

► Display Library holding status

Library holding status is shown as an icon overlay on each book image

► The holding status of books at branch libraries can also be checked

Available Show Status of owned books

Processing Show Status of processing books

Requested Show Status of requested books

► Librarians can click additional the 'Request' button, even if the book has already been purchase requested through a 'Request' submission.

Supports librarian Service

- By scanning (or typing) the ISBN of books, a list of these books is automatically generated and displayed
- Any of the generated lists can be downloaded as an Excel file by clicking on the 'Download' button
- The lists are automatically saved to LAS
- The duplicate status of the books is also displayed
- Media recommendation list creation
- Managing newly arrived books and recommended books
- ISBN Batch Inquiry / Real-time MARC Creation & Inquiry
- Monthly or yearly statistics can be viewed and downloaded on a screen

Provide Thumbnail on Library website

Provide Book image

- 1 Detail view overview, table of contents, about the author, etc

- 2 Preview Provide preview 20~40 pages of text

Real-time MARC solution

► Our unique technology, recognized and protected by international patents!

USA

Japan

Indonesia

The Creation of MARC and Its Characteristics

- ✓ Real-time MARC data is provided for all books — including newly published titles
- ✓ Convert and deliver the library's existing MARC to MARCXML or MODS in real time
- ✓ When a user clicks 'Request Book', its MARC is instantly generated and automatically added to the system

Increase in Speed and Convenience ➤ Time-Saving, Cost-Reduction ➤ Improvement in Work Efficiency

Features and Expected Benefits

- ✓ Instant, tailored MARC data for today's domestic and international new releases-customized to each library's individual settings
- ✓ All MARC created in real time is directly saved into the LAS without manual intervention
- ✓ When a user clicks 'Request Book', the book is automatically sent to the Library Automation System (LAS)
- ✓ Instant MARC generation for donated books with a simple ISBN scan or entry
- ✓ Efficient librarian tasks directly translate into better services for users
- ✓ Librarian tasks becoming highly productive and more efficient
- ✓ Improved library usage and user satisfaction
